

**Real asymmetric actions of force onto a space object in the aether.**

**The Earth only outclosed set of nuclei ruled by aether-process as fallen short of ability of structure change.**

**Drive of ALSP (Alien Light Spy-Plane)**

To make up of aether space-energy shortfall to directions of real vectors. We're using not conventional rocketry.

The moving in gravitation field of Earth.

**The alien' saucer**

### Rough sketch of ALSP

Similar to this saucers falling down on the ground. These are vulnerable structures by electromagnetic disturbances.

We're looking condensed steam around the objects.

## ***Are alien civilization existing? The answer: Yes!***

Those are material and witnesses proofs more than necessary. But the elite keep remain silent. As the scientists to do it case of own mistake for the Big Bang theory. This would be the big civilization?

Where are living the aliens? We have more proof that they are on one moon of Jupiter. This is evident. Let take the crop circles one by one.

The undermentioned message was broadcast into space a single time via frequency modulated radio waves at a ceremony to mark the remodeling of the Arecibo radio telescope in Puerto Rico on 16 November 1974.

And the answer.

The "Arecibo answer" is a hoax by people that created an imprint in a crop field (crop circle) in 2001 near the Chilbolton radio telescope in Hampshire, UK, portrayed as a response from an extraterrestrial civilization.

Which detail is rising above the others the taking out representation of biosphere zone in the Sun-system: Earth, Mars, Galilei' moons of Jupiter. (Evidently, from them visible the Sun as smaller.) Evidently, the mass/local gravitation of inhabited planet, moon determines to the biophysics of evolution. Our build is exaggerated. Because of our metabolism we can not to flying farther the local space.

Every crop circle makes reference to only Jupiter moon, Ganymede. We've more informs. From only outside place visible the together standing to the three objects as the Earth, Sun, Jupiter at 08.13,2014. St. Andrews dorset, England. Who was aware of this? And also visible the „gravitation space-curvature”!

Sky picture from Budapest at 07.25,2014. 12,00 time. Jupiter behind the Sun. Right our Moon.

And at the same time 08.05,2014. Wiltshire, England.  
They do not see the Earth from the Ganymede because of  
covering with Jupiter and Sun.

After it they are employed systematically the fixed orbit  
of moons Io and Europa. From those are many kinds crop  
circle. Examples:

*With Ganymede*

Moon's phases in light of Jupiter.

The following picture is a significant. On their crop circles they are marking the presence of humanoid with points in the actual theme. With changing diameter the path of life. People who know the crop circles they are able to establish the identity.

Inhabited by humanoids third level in the system. Identifiable the own orbit, the rotation around own axis, and presence the humanoids. According in all probability this object the moon Ganymede.

Interests in contact to communication of aliens. They have an interest pictogram system. Easy to understand. Evident the unity to the physics of Earth and Sky. This is statement of Isaac Newton. No new the under Sun. Examples. The electricity is moving spirit of all.

Technical expert can identify the transformer, condenser (charge, discharge) accumulator(D.C.), with good sense the all means of transport (under, ground, aerial, water) and so on. I've to stress the importance of builded up maines system. The left wing does represent fill up to the ALSP' accumulator from outside mains (marking -). The right wing also flying object with own thermonuclear source of power (marking the point). And solar cells. And storage of saucers...!!!

**Division the system of education with accreditation.**

**This is very instructive!**

Pictographic representation of dialog between two humanoid. Whether what does the humanoid on the left say to the one on the right???

Pictogram of „tell somebody something“:
